Chief Anthony Carli

Fire Suppression System Installation, Alteration or Repair Application

For New Installs: All blueprints, shop-drawings, cut sheets, narratives, design specifications and battery calculations must be submitted to the Building Department at 484 Broadway, 2nd Floor. Plans will be reviewed by EFD in conjunction with the Building Department *every second Thursday* of each month. Once approved, the building department will issue the permit.

For Alterations/Repairs: In accordance with 148 M.G.L. 27A, *"no person shall shut off, disconnect, obstruct, remove or destroy, or cause or permit to be shut off, disconnected, obstructed, removed or destroyed, any part of any sprinkler system, water main, hydrant or other device used for fire protection or carbon monoxide detection and alarm in any building owned, leased or occupied by such person or under his control or supervision, without first procuring a written permit so to do from the head of the fire department of the city or town wherein such building is situated.... This section shall not prevent the temporary shutting off or disconnection or partial removal of such a system, main, hydrant or other device for the purpose of making necessary repairs or preventing freezing or other property damage; provided, however, that the head of the fire department is notified immediately of such emergency action. The head of the fire department shall also be notified when the system, main, hydrant or other device is placed back in service. Violation of this section shall be punished by imprisonment for not more than one year or by a fine of not more than one thousand dollars, or both. The supreme judicial and superior courts shall have jurisdiction in equity to enforce compliance with the provisions of this section."*

In accordance with the provisions of Massachusetts General Laws Chapter 148 Section 10a, 527 CMR 1.00, Everett City Ordinances and/or all other laws and regulations, the application to install, alter or repair equipment associated with a Fire Suppression System is hereby made by:
